

With **Unified Comms** you can connect, extend, and communicate seamlessly between tactical military operators, civilian agencies, fleet and field staff, the office, and more.

Advanced Simulation Technology Inc.

500A Huntmar Park Drive Herndon, VA 20170, USA • 703 471 2104 • asti-usa.com

Remove boundaries, walls, and restrictions by unifying all your communications needs regardless of the device, operator, technology, or location.

ASTi's established and field-proven Voisus product line is at the base of the Unified Comms solution.

EASE OF USE

Web-based tools allow rapid changes to your communications configuration as requirements change. Additionally, web-based configuration, monitoring, and management tools means remote access from any computer, anywhere is just a few clicks away.

INTEGRATED TRAINING

Train on the same equipment you use every day without leaving your seat. Simulated radios and communications deliver a built in training mode. Support for DoD training standards (DIS, HLA, DMO, NASMP) provides seamless integration with military training systems and applications over standard networks.

SCALABLE ARCHITECTURE

Add operator positions, radios, phone connections, and intercom capabilities how you need them, when you need them, without disrupting current operations.

RELIABLE OPERATIONS

Cloud-based architecture provides load balancing and failover capabilities to ensure your up-time is all the time.

LOW COST

Designed with low cost of ownership in mind. Purchase only the capabilities you need. Use your equipment, your networks, your devices.

SECURE

Built upon a solid security foundation meeting numerous government information assurance and accreditation standards including Risk Management Framework (RMF).
